Designing Modern Data Estates with TimeXtender

Sample Questions

TX-200-Version-2   ⏰ Remaining Time for Test   **44** minutes, **41** seconds

↳ Section **1 / 9** : Connecting to Data

   ↳ Page **1 / 1**

1. True or False: In TimeXtender, when you **delete** a table, this will automatically execute a script to **drop** the table in SQL Server.
- ☐ True
- ☐ False

2. In TimeXtender version 20.5 and later, which of the following are valid data storage options for a **Data Warehouse**? (Select all that apply)
- ☐ Azure Synapse SQL Pool (previously SQL Data Warehouse)
- ☐ Snowflake
- ☐ Azure SQL Managed Instance
- ☐ Azure Analysis Services Tabular

3. In TimeXtender version 20.5 and later, **Semantic Layer** supports which of the following endpoints? (Select all that apply)
- ☐ Qlik Sense Enterprise
- ☐ Tableau
- ☐ SQL Server Analysis Services Tabular
- ☐ PowerBI

4. When using **Index Generation** setting (**Automatic**), if you want to add a **manual** index to a table which already has one or more indexes, how can you do this?
- ☐ You expand the table, right click on Indexes, select Index Settings, and add an Index.
- ☐ You select Index Automation from the Tools menu, and choose Manual Index Override
- ☐ It's not possible, sorry. Once Indexes are set, you can't change them.
- ☐ You just select Index Automation (manual) in the Advanced menu

5. You are configuring **Multiple Environments** in TimeXtender and plan to have Development, QA and Prod. How many **Repository** databases do you need?
- ☐ 0
- ☐ 1
- ☐ 2
- ☐ 3
